Team Fortress 2 is one of the best shooters out there. I found this great fun using to play with my friends and I decided to create my own. As you can see in the video below I have not had much time to play with it but I have managed to create a pretty fun game and I hope people enjoy it. It is a lot of work and time consuming to create and add more content to the game. And this is why I have not published it as early access yet but I know I will make the time to do so eventually. I would love your feedback and tips for the game and help further develop it as the game continues to evolve. CONTENT ===== CLASSES -9 Different classes, each with their own unique abilities and gameplay style. -Each class is loaded with their own statistics and abilities to make each class unique. -Some classes are balanced for different play styles and others are intended to help gain/win the match quickly. -Try them all! -Future class roster: Heavy - Shotguns, Machine Guns, Heavy Pulse Rifles, A Coon Medic - Medicine, Medkit, Holy Water Sniper - Sniper Rifles, Handguns, Choppers, High Caliber Rifles Spy - Spies, Sneak Kick, Suppressors, Fireworks GRAPHICS & VISUALS ===== -Unreal Engine 4.0 -The artstyle of the game is reminiscent of Team Fortress 2. -I created this in 5 days and it shows. -Some shots are old and outdated but I will get to it and implement things that I was not able to at the time of the video. IMAGES & VIDEOS ===== -The game is a lot of fun to play and very challenging to play. It is the first game I've played where I get fun and enjoyment while playing. And I have a lot of fun playing the game so I hope that you have as well. -I hope you have a good time playing Tombstone and I look forward to continuing to create more fun games for you guys as I learn how to make games. DONATIONS ===== -Any kind of Donation (Paypal, Patreon, etc.) would be very helpful. I would love to continue to make more games and continue to bring in new content. -If you would like to donate but you do not want to use paypal
